From Herr Alfred Benzon
of Copenhagen, Denmark
(Second Collection. See page 33)

This lot was sent May 12, 1880, and reached
me on August 5th, having been
detained in the Custom House, because
I refused to pay duty on them. They
came "Duty free on oath".

They are here recorded under
the names written on labels by Herr Benzon.
To the items written on labels, I have
added the measurements, all of which
are taken with extreme caution, in my
usual manner of measuring.

The collection is recorded in nearly the
same order as "A List of British Birds. The
Genera arranged according to Sundevall's Method.
The Nomenclature revised by Henry Thornton

Wharton, M.A., M.R.C.S., F.Z.S. London: John
Van Voorst, 1, Paternoster Row." 1877. The
extra-limital species are added after each
family, or genus, as the case may be.*

I believe the above catalogue is nearly
complete, so far as regards North
American, and foreign species except
European. Of my collections received
from Mr. Nicholls, a number of
specimens were exchanged into the
hands of Mr. Wm. K. Lute, then of
Cold Spring, N.Y. Of those specimens
I kept no record. Though I remember
many of the species, I have entered
none of them into the Catalogue.

FIRST SHAD OF THE SEASON.—The arrival of the first shad in the harbor of New York is one of the events of the season, a harbinger of spring. The first Hudson river shad, weighing 4 $\frac{3}{4}$ pounds, was caught on Friday last, the 28th, and was sold for \$3.00 to a Fulton Market dealer, who soon was offered \$5.00 for his prize. Hudson river shad will command a high price for several days, but will come down to a low figure after a few days, when they will be abundant. They have been in the market for several weeks, being brought on from the South. They usually appear at Charleston some time in January, at Norfolk in February, in New York about the 20th or 25th of March, at Boston by the end of April, and in the Bay of Fundy in the middle of May. They are caught in Massachusetts rivers in the early part of May, when the apple orchards are in full bloom.
